

Solution

Our solution is a **next generation cryptocurrency trading platform**, introducing Dynamic Trading Rights (DTR) to revolutionise the current trading environment by providing a trustworthy, transparent, safe, and reliable place to exchange ERC20 tokens and other cryptocurrencies that are foreseen to evolve in the future.

Trading platform also introduces DTR Voice. The community will be periodically consulted about our future decisions regarding both future trading pair listings and other decisions that would contribute to the user experience.

Business Profitability

Based on current market data, we have predicted our earnings in the first year of operations. We have based our calculation on the assumption that we will take over **2.5% of the world's crypto/crypto** trading volume.

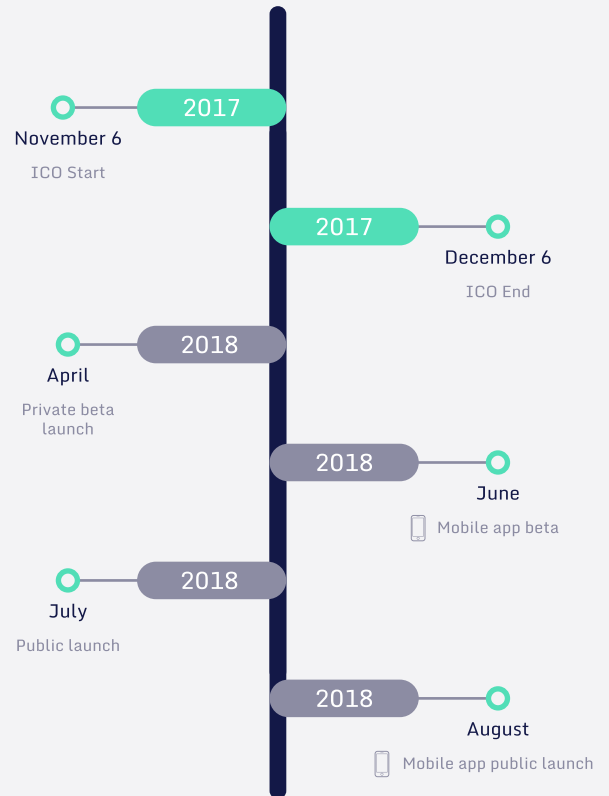

Y1 Earnings: \$18M

Average fee: 0.15% (0.075% buyer/seller direction)
