

Dear backers,
Supporters,
Crypto community,

2017 witnessed the birth of the superior cryptocurrency exchange

On November 6, 2017 we launched Token Sale which closed with the hard cap of \$15M, a week prior to the deadline. This confirmed our concept had been positively accepted amongst the community for the values and vision we presented. Again, we see that the crypto environment requires increased trust and transparency, safety and reliability for a variety of stakeholders and our aim is to get it done for you. You deserve it!

We are changing focus from ICO to the platform

Token distribution, the last milestone of the ICO project, is still underway and will cease at the end of February 2018. After this deadline we will definitively and unconditionally terminate any ICO related activity or support, solely focussing on the platform development. We must look ahead and steer the project to deliver our promise.

We do not plan any more listings and do not manipulate the token price

The community has asked often about our intentions for further listings. We do not plan to add DTR to any other exchange, believing we have already captured the interest of those who wanted to follow the price development. DTR token will be listed as the first token on Tokens' platform against other major cryptocurrencies. If, by any chance, any exchange adds DTR token, it will only prove our peers have acknowledged the relevance of having it listed. By far most important, we are not influencing either DTR token price nor its volume. We see an increased awareness from the community surrounded in our story and to provide you with another layer of guarantee, a sign

that we truly mean business, the core team has autonomously vested future benefits from the project. We are in for good!

We are fully dedicated in meeting given milestones

Our target at this stage is not to hype the community by sending out fluffy posts, nor phony news. We are not on a shopping spree, enjoying luxury and flying first class. Hard work is no stranger to us and we will continue in this fashion until our goals are exceeded. Our team members have been and will be brought in because of their belief in the project, their excitement that Tokens.net will be a game changer and for the immense expertise they will personally contribute to it. We have opened job posts. The recruitment drive to secure the most talented individuals has begun and the process is expected to be complex to ensure only the best of the best join this innovative group of minds. Our focus at this stage is to set the foundations, spending countless hours turning fiction into reality. Our team dive into the issues and tasks at hand to deliver the project in a timely, effective manner. If, throughout the project, we feel the need for your support, your voice will be appreciated. When the time is right to share progress with you, we will display demonstrations, comment on the development or provide insights from the project either directly with you or through social media channels. Such conditions are extremely essential, allowing us to focus on what we believe is important and vital for the future success of this project. Thanks for your understanding.

**Again, we heavily appreciate your support and from all the team,
we wish you a prosperous 2018!**

Damian Merlak
